### Capt. R. Brogan Pilots Globester Plane in India

#### Antioch Veteran of 'Hump' Route Shares Historic Flight

Capt. Robert A. Brogan, son of Mr. and Mrs. H. J. Brogan of Antioch, was pilot of the new Douglas Sky-master C-54 on the 1,485-mile Karachi-Calcutta, India, stretch of the Air Transport command's Globester Flight—this was the news that thrilled residents of the lakes region early this week.

Lake county had a further share in the honors in that T/Sgt. Gene Montecchie, Highwood, was flight engineer.

Capt. Brogan brought the plane's flight up to schedule by the time he arrived at Calcutta, in spite of heavy clouds that closed in during the last 200 miles. It had been late in its arrival at Karachi, where he and his crew took over.

Capt. Brogan has been piloting plans over the "Hump" in the India-China-Burma theater for the past two years.

#### Had Been Instructor

He was for two years a flight instructor at Rosecrans field, Texas, having received his training at Lubbock field. He was commissioned four years ago.

He was employed at the Johns-Manville plant before entering the service, and previous to that had been a student at the University of Illinois.

#### Two Brothers Serve

A brother, Lt. Col. John Brogan, has been home on leave after spending two years in Italy, where he was a commanding officer with the Fifth army.

Another brother, Roger, is a sergeant in the Army Air force, at Camp Wolters, Tex.

### Commence Lowering Walk In Front of Three Homes

Work is well underway this week on the project of lowering the sidewalk on the east side of Main street in front of the M. C. Cain and John Dupre residences, in order to permit lowering the entrances of the driveways there.

In order to take care of the slope for lowering the walk and to eliminate the necessity for a step at this point, the walk will also be lowered across the front of the H. B. Gaston home.

Arthur Laursen is the contractor in charge.

### RECONVERSION ROAD BLOCK - - By Collier

### Antioch Lumber Co. Plans Building Survey

Ed F. Vos, president of the Antioch Lumber and Coal Co., today announced a survey on prospective home building and remodeling in this community to be conducted by his company.

Pointing to the critical nationwide shortages of lumber and skilled lumber workers, Vos said: "In order to get the building materials necessary to meet all home construction needs here in Antioch we must know what those needs are going to be."

One feature of the survey will be a series of new letters about the building industry, the first of which went out today, together with a survey card, to a cross-section of local homeowners. Based on facts and figures from Washington and from leading building industry authorities as compiled by the Johns-Manville News Research Bureau, Vos said he hoped these letters would help homeowners. To interpret construction news as it breaks "in terms of their own personal plans to build or remodel."

"It is also my hope that this survey will help to spearhead Antioch over the reconversion hump," Vos said. "As President Truman stated in his message to Congress last month, the field of housing, plus all the goods and services dependent on it, offers 'the largest single opportunity for rapid post-war expansion of private investment and employment.'"

### Three are Injured in Collision on Hy. 173

Mr. and Mrs. Drayton Mitty, Berwyn, and Y. W. Friedlund, Waukegan, were seriously injured in a collision at a curve on Highway 173 a mile west of Highway 59 Saturday at 6:30 P. M.

The Mitty car struck a tree after leaving the road as a result of the collision with the truck.

The injured were given first aid by the Antioch Rescue squad and removed to Victory Memorial hospital.

Antioch Fire department for Wednesday evening, Oct. 10, will be postponed for one week, it has been announced by L. R. Van Patten, fire chief, who is also acting as general chairman for the Antioch War Fund drive.

The dance is to be the climax of the campaign, opened here Monday under the auspices of the fire department.

Antioch township's War fund goal this year is \$1,500. Checks and money orders may be made payable to the War Fund, care of Antioch Fire department.

### Will Be Used for Bensenville Game Tomorrow

#### Lions Club to Make Formal Presentation at Evening Game

At a "preview" test conducted last evening, the newly-installed athletic field lights at Antioch Township High school were pronounced "perfect."

Final hookups of all cables were made by the Carey Electric shop, contractor for the project, yesterday, and the lights were turned on for a two-hour period in the evening.

This evening, the Antioch Township High school football players will hold their first practice under the lights in preparation for their first home conference game of the season, with Bensenville tomorrow evening.

#### Band to Play

The formal dedication ceremony and presentation of the lights to the school will take place in connection with tomorrow night's game, with President Harry J. Krueger representing the Antioch Lions club, sponsor of the project.

Acceptance on behalf of the school district will be made by Walter K. Hills, president of the high school board, and T. R. Birkhead, principal. The high school band will take part in the program.

The lights are mounted on 65-foot poles set 10 feet into the ground, bringing the lights 55 feet above the playing surface.

#### 52 Reflectors

There are 52 reflectors, each equipped with a 1,500-watt bulb. When the lights are all in use, they utilize approximately 100 horsepower and 78,000 watts of electricity.

The football games, for which the lights are set at present, will require the largest lighted area.

The lights can be used for ice skating and hockey, and by changing the angle of the reflectors, estimated at about an hour's job, they can also be adapted for softball games.

## Don't Throw Away the Key

The termination of the war did not bring a clean-cut victory to the United Nations. The avowed objective of freedom from political oppression for which the war was fought, is less in evidence today than at any previous time, not excluding the era of Hitler. The United States now stands alone as the champion of individual enterprise and the exponent of government as the servant rather than the master of the people. Over most of the world peoples numbed by suffering, seem anxious to become charges of masterful governments.

The United States remains the one great nation with production and distribution under the ownership and management of private citizens. Thanks to this system, our farmers and factories, our retailers and workers—tens of millions of them—can make a living independent of government. As long as they can do that they need never fear political oppression. The privilege of earning a living unsupported by government handouts and resultant political "persuasion," is the key to freedom. The people of Europe have thrown away this key. Even in England and France, the key is being turned over to government.

Let's not throw away the key to freedom in our country. Private enterprise, which socialism destroys, may have its drawbacks. But its shortcomings can always be corrected. Private enterprise is the source of independent jobs—for employer and employee alike. As long as private enterprise exists, government payrolls can be kept to a healthy minimum, and we can tell of officialism to go to blazes, without fear of the consequences.

## Plastics From Feathers

One of these days you may be raising chickens as much for their feathers as for meat and eggs, says FARM JOURNAL.

U. S. chickens grow about 100 million pounds of feathers a year. Some 10 to 15 million pounds find their way into cheap pillows and other uses, at about 5 cents a pound. The rest is just waste. One reason is that wet feathers quickly decompose, hence there has been no use for them.

Now the USDA says they can be preserved in a

solution containing .55 of a pound of silicic acid and 1.1 pounds of benzoic acid to 30 gallons of lukewarm water.

This may make vast quantities of feathers from poultry dressing plants available for some of the new uses that have been found.

By dissolving the feathers in chemicals, 60 per cent to 70 per cent of their weight can be recovered in a heavy syrup. Forced through tiny openings in a spinneret, this syrup can be transformed into a highly elastic, all protein thread. One use for it might be in belting, to replace cotton fabric.

Tests also have been made with the thread for surgical sutures. The body eventually will absorb the all-protein thread, thus making removal of stitches unnecessary.

Dissolved feathers also may be molded into plastics, which readily take dyes, thus making them usable in many ways.

Other experiments have been made by grinding up feathers, from which the quills have been removed. This may be a satisfactory substitute for eider down in sleeping bags and life jackets. Plywood adhesives also have been made.

Most of this work still is in the experimental stage, but a bigger, better supply of feathers resulting from the new preserving treatment may hurry the whole development. When and if it does become business it will mean more chicken money for you.

## Large Cones

In dormant pruning of black and purple raspberries, leave all large canes, cutting fruiting laterals or branches to 8 to 12 buds, or 6 to 8 inches in length. Purple raspberries may be left longer, as they grow more vigorously. Laterals on black and purple raspberries may be cut severely without serious reduction in yield. Short pruning reduces the number of berries, but increases berry size, shortens the picking season, and reduces the effects of drought.

Sixteen guests, as well as the club membership, were present at the luncheon, which was held in the Lake Villa gymnasium under the charge of the Women's Society for Christian Service.

A style show staged by the Marianna shop will be a feature of the club's meeting Monday afternoon, Oct. 15, in the home of Mrs. L. C. Scott, Antioch township. ## Library News

(By Marian Rigby)

"The Life of Greece," second volume of Will Durant's Story of Civilization Heinzelman. Dr. Durant tells the whole story of Hellas, from the days of Crete's vast Aegean empire to the Roman conquest. He touches but lightly on battles and sieges, tyrants and kings, to give the major emphasis to a vivid re-creation of Greek culture during the era when Greece dominated the civilized world.

Dedicated to the memory of the late Michael Golden, "Bolts of Melody," by Emily Dickinson, is a valuable addition to the library's collection of American poetry. In his foreword, Mark Van Doren says, "No reader or student of Emily Dickinson needs to be told that the appearance of this book is an event of large importance."

In "The Peacock Sheds His Tail," Alice Tisdale Hobart has written a novel of international marriage with the scene laid in Mexico. The members of the aristocratic Navarro family reflect the struggles of Mexico toward democracy. A young diplomat from the United States falls in love with the beautiful Concha Navarro and their private drama is caught up in the larger struggle between the reactionary and the progressive.

## Bensenville Bisons Will Be Sequoits' Opponents Friday

### Game Will Be First Under New Lights at H. S. Field

(By Ralph Trieger)

The Bisons from Bensenville will invade Sequoit territory Friday night at 8 o'clock. This first home conference game will also be the first contest played under the newly-installed lighting system.

The team is determined to do its best and it is hoped by all that they may gain a victory over the highly rated boys from Bensenville. Both teams lost their conference openers which were played last Saturday. Bensenville being licked by a powerful Northbrook team 14-7; and Antioch losing to the potential conference winner, Barrington, 12-0.

It is assured the first nocturnal battle at the home of the Sequoits will be a thriller from the kick-off to the gun.

Last Saturday's game at Barrington showed that the boys have improved their game both offensively and defensively. The ball was slippery and the field spongy, resulting in many fumbles by both teams, which made the game exceedingly interesting.

The Antioch Frosh-Soph will play the Barrington Frosh-Soph this Friday afternoon on the Antioch gridiron at 4 o'clock.

### BESSIE BARNES' ORCHESTRA TO PLAY FOR P. T. A. EVENT

Parents and teachers of the kindergarten, first and second grade pupils at Antioch Grade school are acting as the committees and sponsors for a card and dancing party to be held Saturday evening, Oct. 20, for the benefit of the Grade School Parent-Teacher association.

Ethel Hampson and John Sowa attended the couple.

He has been serving with the navy since three years ago this December, spending 20 months of that period on patrol along the eastern coast.

More than a month after V-J day, and despite considerable cut-backs in Wisconsin industry, less than four percent of the total number of workers covered by the Wisconsin unemployment insurance law have yet applied for benefit claims under that program.

The total figure, about 21,000, has shown little change during the last two weeks.

More significantly, of the 17,000 persons who claimed aids in the week ended August 25, only 7,800 were still filing claims last week to cover the third week of unemployment. Most of the 17,000 who were heard from first did not remain unemployed long enough to draw even a first benefit check.—Wisconsin Press Association.

**NEW B. F. Goodrich PASSENGER TIRE OUTWEARS PREWAR TIRES!****New Passenger Car Tire with Safer-driving, Longer-mileage features****New, better Synthetic Rubber**

Developed by B. F. Goodrich—it's far better than ordinary synthetic rubber. Helps the new tire run cooler, wear better. It resists cracking, bruising and damage from accidents better too.

**New, "Road Level" Tread**

35% stronger tire body makes possible tread with a flatter contour—its whole width touches the road. More rubber on the road to share the wear—evenly. The tread design has hundreds of skid-resisting curves to grip—and stop quickly!

**16,800,000 Test Miles**

Has more test background than any previous B. F. Goodrich tire. Extensive laboratory tests plus 16,800,000 miles of actual road tests—on taxi fleets, police cars, and the B. F. Goodrich test fleet—proved it outwears prewar, natural rubber tires!

**3 years' EXTRA synthetic tire experience**

Three full years before any other manufacturer, B. F. Goodrich sold tires made with synthetic rubber to American motorists. This extra store of experience shows up in extra mileage... extra safety... extra value.
